

Education

Ph.D., Computer Science, University of Massachusetts Amherst Sep 2015 - Jun 2021
M.S., Computer Science, University of California San Diego Sep 2013 - Jun 2015
B.S., Electrical Engineering, National Taiwan University Sep 2008 - Jun 2012

Research experiences: computer vision, machine learning, generative models, data engine, ML ops, object recognition/detection, self-/semi-supervised/few-shot/transfer learning, vision and language, representation learning.

Programming Languages and Libraries: Python, PyTorch, Tensorflow, NumPy, OpenCV

Work Experience

NEC Laboratories America, Researcher Jan 2023 - Present
Controllable data simulation using diffusion models and 3D reconstruction methods for autonomous driving
– Proposed novel methods for generating videos for autonomous driving conditioned on scene descriptions and BEV maps.
– Combined diffusion models and 3D reconstruction to generate controllable 3D scenes with editable moving objects.

Automatic data engine for autonomous driving using VLM/LLM

– Created low-cost data systems that automatically identify issues, query/generate data, improve the model by self-training, and leverage VLM/LLM for verification, for autonomous driving stacks in 2D/3D perception, prediction, and planning.
– Lowered 10x labeling and training cost by replacing human curation with VLM/LLM on 2D object detection.

Meta AI, Research Scientist Jul 2021 - Nov 2022

AI Commerce – Worked on visual search for products, including object detection, classification, and retrieval.

– Improved classification and retrieval accuracy by 5% using hierarchical predictions in the label space with 10k categories.

AI Research for Monetization – Increased the revenue with ads ranking models using content understanding features.

Computer Vision Lab at UMass Amherst, Research Assistant Sep 2015 - Jun 2021

– Published papers on transfer/semi-/self-supervised/few-shot learning, domain adaptation, and vision and language.

– Worked intensively on fine-grained object recognition, created benchmarks and sota methods on semi-supervised learning.

Facebook AI, Research Intern Jun 2020 - Aug 2020

AI commerce – Developed generative models for generating catalog images of clothing items using organic images.

NEC Laboratories America, Summer Research Assistant Jun 2018 - Aug 2018

– Proposed novel methods of active learning for domain adaptation on object classification, detection, and segmentation.

Amazon Web Services, Applied Scientist Intern Jun 2017 - Aug 2017

– Worked on an alternative solution of generative models using GANs and nearest neighbor search in the deep learning team.

Professional activities

Organizer: FGVC{7,8,9,10,11} workshop at CVPR {2020, 2021, 2022, 2023, 2024}

Area Chair: WACV 2024

Conference Reviewer: CVPR, ICCV, ECCV, NeurIPS, ACCV, and WACV, since 2018

Journal Reviewer: PAMI, IJCV, IROS, ICRA, and TOMM

Graduate Student Representative, UMass Amherst CICS 2020-2021

Awards

Doctoral Consortium, CVPR 2021

Outstanding Reviewer: CVPR 2018

Outstanding TA Award, UMass Amherst CICS, 2021
